Leader at start

All leaders should carry a First Aid Kit when leading a walk. These kits are the property of the club (one for each walk day). Leaders can get First Aid Kits from Geoff Batts David Lanigan, John Wadge, or Graham Jakes and return them after their walk.

DISCLAIMER: Walking is inherently safe but people should be aware of their own fitness levels and ability to complete a walk before they start out. Walkers should be appropriately dressed and prepared for a wide variety of terrain and weather conditions.

A gentle reminder of information given to you when you joined the club:

A third party Insurance is held by the Club which does not cover personal indemnity. The Club or any of its agents acting on behalf of the Club shall not be held responsible for the death, injury, accident or damage, etc to the person or property of any member, guest or any other person occurring during and arising from participation in any of the activities advertised in the Club's programme. Damage by dogs is not covered by the Club's insurance policy. This is the owner's responsibility. Accidents to any person on a walk should be reported immediately to the Club's secretary.

Many thanks to all leaders for another full programme. It's you who keep the Club "on the move". Well done.

Regards from Steven.

A REMINDER AS SUMMER APPROACHES

LYME DISEASE is caused by bacteria which can be passed to humans if an infected tick bites them. Symptoms start about a week after such a bite: a red blotch around the bite followed by flu-like symptoms. In more serious cases complications can occur, the most long term being arthritis. If any symptoms do develop, see a doctor straight away. The disease is more common in summer when ticks are more active. In grassy, bushy or woodland areas wear long trousers tucking the bottoms into your socks, a long-sleeved shirt with sleeves rolled down and cuffs fastened, and wear shoes not sandals. Any ticks can then be picked off the clothes. If a tick does get on to the skin, *carefully* remove it as soon as possible, ensuring both the body and mouth parts are removed. If available, covering the tick with cooking oil or butter, or a drop of methylated spirit, alcohol, TCP or nail polish remover on its body make it remove its grip from the skin. You may need tweezers
